

Why ask a fish to climb a tree?

Who would do that? Fins are great for swimming, but not for gripping bark. Gills work well in water but not so much in air. Fish are just not designed to climb trees because they belong in water. And for many people, their jobs and educational pursuits leave them feeling like a fish out of water and looking up at a tree.

Can you relate? What if someone could help through an easy and exciting process to find the right job and/or course of study that actually fits you? What if, in your job, you could be like a fish in water instead of out?

The new **Career Direct GE** consultant based career assessment tool is finally here for you! Our assessment takes a deep look at your **Personality, Interests, Skills/Abilities, and Values**, and trained consultant Peter Durkee will work through the assessment results with you to help you understand how your "wiring" is directly linked to the career field that would fit best.

Every CD Consultant is trained and specifically qualified, and they all meet the following criteria:

- **In a committed relationship with the Lord and member of a Bible-believing church**
- **Heart to help people discover the career path they were meant to walk**
- **Devoted to seeking God's guidance through prayer**
- **Talent for asking probing strategic questions and listening carefully to answers**
- **Ability to analyze Career Direct GE's specialized report data**

God has created you with a specific design, and we're excited to help you understand it so that you'll have more confidence in making occupational and educational choices!
